The screenshot displays a web application in Visual Studio. The top part shows the design view of a web form. The form includes a text box for a name, a label, a radio button list with options 'Male', 'Female', and 'Other', a dropdown list with options 'BScit', 'Bscs', and 'BCA', a calendar for selecting a date, and a checkbox for 'Terms and Conditions'. A 'Submit' button is at the bottom.

The bottom part of the screenshot shows the 'Client Objects & Events' window with the code-behind for the page. The code is as follows:

```
